Master size	2700 x 2700 pixels, sRGB, 300 DPI metadata
Bleed	No added bleed beyond the 9 x 9 personalization area
Orientation	Supplied artwork is not mirrored

Printing and Proofing

Choose the production path that matches the final tray surface.

Smooth vinyl insert

Print the clean 9 x 9 master with the vinyl vendor's validated ink, laminate, adhesive, and cutting profile. Do not add burlap, canvas, linen, grain, or decorative surface texture to a vinyl print.

Direct sublimation on SBL352

Use 385-400 degrees F for 60-75 seconds at medium pressure. Follow the supplier press stack and mirror setting included in the Supplier Files folder. The supplied clean masters are not mirrored and contain no simulated substrate texture.

File Use

Use the PNG, TIFF, or print-ready PDF in 01_Print_Masters for production. The supplier placement proof is for alignment review only. Do not print the red or black template guide lines.

Physical Proof Required

Request one physical proof on the final selected surface before the full run. Confirm color, edge placement, finish, crop, and the printer's mirror setting.

Package Contents

The printer package includes the selected PNG, TIFF, and PDF masters; one tray mockup; one supplier-template placement proof; the official EPS template; supplier product details; sublimation instructions; this handoff; and SHA-256 checksums.
