CROP

Show the full square image; do not crop or zoom

FINISH

Satin, luster, or true matte photographic finish

MOUNTING

Rigid board or framed print suitable for a floor easel

Color and Quality Control

- Disable automatic skin smoothing, painterly effects, canvas texture, film overlays, and decorative sharpening.
- Do not add burlap, linen, vinyl, or paper texture to either portrait file.
- Preserve Bob's natural age lines and the clean fabric detail in the supplied masters.
- Print one reduced or full-size physical proof of each portrait before final production.
- Review the proof under neutral light at both close range and the intended service viewing distance.
- Keep color management in sRGB unless the printer supplies and applies a validated output profile.
